Shivam Amarghade

Aspiring Software / Associate System Engineer

Bhopal, MP (Open to relocate – Indore) | +91 8223846001 | shivamamarghade@gmail.com | LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Recent B.Tech graduate from OIST Bhopal, currently interning at MPOnline, a joint venture between the Government of Madhya Pradesh and TCS. Focused on web technologies, the MERN stack, MySQL and AI-powered tools to improve development speed and code quality.

EXPERIENCE

Software Engineering and AI Foundation Intern **May 2026 – Oct 2026 (6 Months)**

MPOnline Limited – Joint Venture, Government of Madhya Pradesh and TCS, Bhopal

- Worked on frontend development and module testing for **E-DAK**, an enterprise Correspondence Management System used by government bodies, on a live e-Governance platform serving real citizens.
- Collaborated daily with **3 cross-functional teams** (developers, QA, business analysts) over a **6-month** live delivery cycle, adapting quickly to enterprise processes and delivery timelines.
- Applied React.js, Node.js, Express.js and database concepts to production-grade applications with strict reliability requirements.

PROJECTS

E-DAK – Enterprise Document Portal | React.js, JavaScript, REST APIs **MPOnline Internship**

- Enterprise-grade Correspondence Management System for government bodies, institutions and organizations, delivered during the MPOnline internship; live at edak.mponline.gov.in.
- Implemented and maintained **React.js** frontend components and screens, integrated with backend REST APIs.
- Tested application **modules** end-to-end: functional checks, bug reporting and re-validation of fixes with QA and development teams.

AI-Powered Exam Preparation Platform | React.js, Node.js, Express.js, MongoDB, Gemini API, Stripe **Personal** | GitHub

- **Independently designed, coded and deployed the entire platform** (frontend, backend, database, payments and AI integration).
- Created a full-stack learning platform featuring secure JWT-based authentication and **15+ RESTful API endpoints**.
- Integrated **Gemini API** for AI-generated practice content and **Stripe** payments for a credit-based subscription system; deployed a production-ready backend on Render.
- Optimized MongoDB schemas and queries with indexing, improving API response time by **~40%**.

JobWorld – Backend Recruitment Platform | Node.js, Express.js, MongoDB **Personal** | GitHub

- **Independently engineered the complete backend** from architecture and database design to API development and testing.
- Developed **12+ RESTful APIs** managing job postings, applications and recruiter workflows.
- Implemented JWT authentication with **role-based access control for 3 roles** (Admin, Recruiter, Candidate).
- Applied centralized error handling and input validation across **all endpoints**, improving reliability with production-quality, maintainable code.

SKILLS

Languages: Java, JavaScript

Backend: Node.js, Express.js, REST APIs, JWT Authentication

Frontend: React.js, Redux

Databases: MongoDB, MySQL

Tools and Deployment: Git, GitHub, Postman, Render

AI Tools and Skills: Antigravity, Cursor, Claude Code, Prompt Engineering

CS Fundamentals: Data Structures, Algorithms, OOP

ACHIEVEMENTS AND CERTIFICATIONS

- Programming in Java – NPTEL
- Reverse Coding X – Shaastra 2026, IIT Madras

EDUCATION

B.Tech – Computer Science and Business Systems **2022 – 2026**

Oriental Institute of Science and Technology, Bhopal **CGPA: 8.14/10** (9.3 SGPA in 7th semester)
